Artist Statement

This image comes from a series I did called Effervescence , what appealed to me was the movement of the bubbles , the mixture of color , and the depthness of each image . I thought these 3 images went together well , I love the gold and green mix . It allows the mind to wonder and wander .. I suppose I could put a meaning to the image . I question myself , over this matter , but I decided to the allow the viewer , to make their own opinion. I just hope the see the beauty in the image as I saw it .
