Studied with Rudolf Baranik at the Art Students League From 1991-1996. Stuart taught junior high and high school art for 33 years and now paints full time.

Artist Statement

My work is an on-going series of paintings inspired by construction sites. I have played with distortions in linear perspective and abstraction of space and shapes. In these pieces the architectural imagery is eliminated yet reference to structure still remains. In each painting, two disparate painting approaches are combined into one work. The two parts are unified yet maintain their differences. I see an interpersonal relationship happening between the two approaches. These works remind me of a marriage of opposites or a friendship between two divergent personalities.
